DETAILED ACTION

Election/Restrictions

- Claims 2-13 are withdrawn from further consideration pursuant to 37 CFR
 1.142(b) as being drawn to nonelected inventions, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 8.
- 2. The restriction requirement is made FINAL.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

- 6. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Vayssie et al., US 5,073,174. At col. 3, lines 41-42, the reference discloses that 2-hydroxymethyl-4-aminophenol and 2-(beta-hydroxyethyl)-4-aminophenol are useful hair dye precursors. The reference does not disclose the compound recited by applicant. However, it would have been obvious at the time that the invention was made to use this compound as a hair dye intermediate, because the reference discloses that a one-carbon homolog of the compound and a simple structural isomer of the compound have the same utility as that disclosed by applicant. The person of ordinary skill in the dyeing art would expect the recited compound to have similar properties, absent unexpected results.
- 7. Any prior art made of record and not relied upon is of interest and is considered pertinent to applicant's disclosure.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner, Dr. John R. Hardee, whose telephone number is (703) 305-5599. The examiner can normally be reached on Monday through Friday from 8:00 until 4:30. In the event that the examiner is not available, his supervisor, Dr. Yogendra Gupta, may be reached at (703) 308-4708.
